

# Healthcare

Designing comprehensive, innovative healing spaces with patients in mind.

## EXPERTS - PUBLISHED & PROVEN

Our healthcare experts have been featured in

*Health Facilities Today*

*Health Facilities Management*

*Medical Design & Construction*

From hospital renovations and expansions to long-term care facilities, surgery and oncology centers, and everything in between, our team of healthcare experts will work with you as a trusted partner at every step. We approach each project as a collaborative effort—listening to your vision, examining needs, and offering creative solutions based on flexibility, sustainability, and efficiency.

SSOE's professionals recognize the rapid advances in healthcare technology, security, and patient care, and provide design options that incorporate industry-recognized best practices, Evidence-Based Design (EBD), and patient preferences. For more than 20 years, we have designed patient care facilities using Lean principals to provide efficient solutions to improve workflow and increase safety. We recognize the impact your facilities have on the everyday lives of patients and caregivers, and aim to create healing environments that are warm, welcoming, and user-friendly.

**9 YEARS**  
TOP DESIGN FIRM

Top Healthcare Design Firm for the past 9 years  
(*Modern Healthcare*)

**WORLD'S 1<sup>ST</sup>**  
MRI GUIDED  
RADIATION SYSTEM

SSOE and Henry Ford Health System Installed the world's first MRI-guided radiation therapy system

**\$20M**  
COST SAVINGS

 Veterans Administration  
 Welltower (formerly Health Care REIT, Inc.)

## PROJECT TYPES

- Acute care hospitals
- Assisted living facilities
- Ambulatory care centers
- Behavioral health and psychiatric facilities
- Cancer / oncology centers
- Critical access hospitals
- Data centers
- Emergency centers
- Heart / vascular centers
- Imaging and diagnostic centers
- Long-term care facilities
- Medical education facilities
- Medical laboratories
- Medical office buildings
- Rehabilitation hospitals
- Replacement hospitals
- Specialty hospitals
- Storm shelter facilities
- Surgery centers
- Urgent care centers
- Women's centers

## TECHNICAL SPECIALTIES

### ARCHITECTURE

- Healthcare architecture
- Medical planning
- Pharmacy renovations for USP 797 and 800
- Statement of Conditions
- Strategic master facility planning

### INTERIOR DESIGN

- Art consulting
- Branding
- Custom detailing
- Finishes
- Furniture and fixture selection
- Signage and wayfinding
- Specialty lighting design

### ENGINEERING

- Boiler / chiller systems
- Building management systems
- Civil engineering
- Data / Fire / Security systems
- Electrical power systems
- Generator / emergency power systems
- HVAC systems
- Lighting systems
- Mass notification systems
- Medical gas systems
- Nurse call systems
- Parking and traffic flow systems
- Plumbing systems

- Structural engineering / upgrades

### GENERAL SPECIALTIES

- 3D animation and renderings
- Access control
- Building Information Modeling (BIM)
- Campus security
- Code analysis and consulting
- Energy efficiency analysis
- Infrastructure upgrades
- New construction
- Renovations
- Site development
- Virtual Reality (VR) walkthroughs
